

Online Child Care Directories

Utilizing Online Child Care Directories:

When a parent needs child care, they will most likely do an internet search for child care near them. It is so important to list your child care program and website on the many child care directories out there. The more directories you are included in, the more likely parents will find you. In addition to your state licensing website (who should have you listed), here is a list of many child care directory websites that you can add your program to:
